Education

UNIVERSIDAD DE GUADALAJARA

Mechanical Electrical Engineer, Mechatronic.

Relevant Coursework: Coding Bootcamp in Tecnológico de Monterrey

Guadalajara, Jalisco

Graduation Date: MAY 2022

Experience

Flextronics

Process Engineer Technician

Zapopan, Jalisco

Oct 2022 – May 2023

- I explore and analyze the production processes of our company in detail. I identify areas that could be improved and seek opportunities to increase efficiency and quality.
- I design innovative solutions to optimize our production processes. I am enthusiastic about implementing new technologies, reorganizing workflows, and updating our equipment to achieve a higher level of efficiency.
- I am dedicated to ensuring high-quality standards in our products or services. I conduct rigorous inspections and tests, and collaborate closely with the quality control team to ensure that our customers receive the best from us.
- I am responsible for keeping our work procedures updated and documented. I use diagrams and roadmaps to ensure that each step of the process is defined and easily understandable for everyone involved.
- I am passionate about sharing my knowledge and experiences with the team. I provide training and development to ensure that everyone is aware of the latest implemented improvements and has the necessary skills to perform their tasks effectively.
- When problems arise in the production processes, I take pride in thoroughly investigating the root causes and seeking creative and efficient solutions. I work closely with other departments to quickly resolve issues and minimize any impact on our production and quality.

Hotel Hyatt

Maintenance Engineering Intern

Zapopan, Jalisco

February 2022 – May 2022

- Preventive and Corrective Maintenance: Plan, coordinate, and carry out preventive maintenance activities in the hotel facilities to ensure smooth operations. Additionally, respond promptly to maintenance issues and perform corrective repairs when necessary.
- Facility Supervision: Inspect and maintain electrical installations, plumbing systems, air conditioning systems, elevators, and other key areas of the hotel, including the cold air system.
- Safety and Compliance: Ensure that all facilities comply with safety standards and regulations, ensuring the safety of guests and staff.
